

REIHAN APRIANDI

Forestry & Spatial Data Science · Remote Sensing · Environmental Analytics

Pekanbaru, Riau, Indonesia | +62 888-0402-2931 | apriandireihan@gmail.com | linkedin.com/in/reihan-apriandi-700845266

PROFILE

Final-year Forestry undergraduate with professional experience in land cover analysis and field validation at an international research organization. Holds certifications in spatial technology, remote sensing, and data analytics — integrating forestry expertise with Spatial Data Science to support evidence-based conservation and sustainable forest management.

EDUCATION

Bachelor of Science in Forestry

Universitas Riau · Faculty of Agriculture · 8th Semester · GPA: 3.68 / 4.00

Aug 2022 – Present

PROFESSIONAL EXPERIENCE

Intern – Analyst Assistant

RECOFTC – The Center for People and Forests · Indonesia

Jan 2025 – Jun 2025 · 6 months

- Digitized land cover and land use features from satellite imagery using an established land cover classification scheme.
- Verified and cross-checked land cover interpretations via Collect Earth Online against reference and training datasets.
- Conducted field validation to assess the accuracy of land cover interpretations derived from satellite imagery.
- Supported accuracy assessments by comparing interpreted classes against field reference data, contributing to an accuracy target of approximately 90% through confusion matrix evaluation.
- Coordinated with the project team to ensure methodological consistency between remote sensing interpretations and field observations.

Capstone Project Participant – Student Stress Analysis

Hacktiv8 × IBM SkillsBuild · Online

Oct 2025

- Analyzed a student stress dataset using Python, exploring correlations across subject types, learning environments, and stress outcomes.
- Conducted exploratory data analysis (EDA) to identify patterns and variable relationships, generating insights into positive and negative stress drivers.
- Produced visual reports using Pandas and Matplotlib to communicate findings to non-technical audiences.

Forest Management Field Training Participant

HPGW – Institut Pertanian Bogor (IPB University) · West Java, Indonesia

Jul 2024

- Completed field practicum covering community forestry, forest inventory, nursery management, soil conservation, non-timber forest products, block area mapping, and in-situ conservation methods.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Expert Staff, Commission 4

Student Representative Council (DPM), Universitas Riau

Jan 2024 – Dec 2024

- Contributed to institutional policy discussions and student governance within the campus legislative body.

Expert Staff, Fundraising & Business Division

Forestry Student Club (FSC), Universitas Riau

May 2023 – Sep 2024

- Coordinated fundraising activities and managed business initiatives to support club operations and academic programs.

SKILLS

Technical Skills

- GIS & Remote Sensing: ArcGIS, QGIS (Advanced), Google Earth Engine

Core Competencies

- Analytical Thinking & Attention to Detail
- Field Research & Ground-Truth Validation

- Programming – Intermediate: Python (Pandas, Matplotlib), R, SQL
- Exploratory Data Analysis (EDA) & Data Visualization
- Microsoft Office Suite – Intermediate
- Cross-Functional Team Coordination
- Time Management & Accountability
- Technical Report Writing
- English Proficiency – B1 (Intermediate)
